*Smoke Detectors Save Lives!*

## *Chief's Welcome*

Hello and welcome to the Carrollton Fire Department's web page.

It is exciting that you have decided to familiarize yourself with our department and the services that we provide. As with many Fire Depts. today we do much more than just fight fires, however this is still the largest part of our mission. Even though we hope that no one experiences the damaging effect of a fire in their home, business, or other property, we train and prepare so that we are able to lessen your loss when this does occur. We also try to help prevent as many fires as possible through educating the public in ways of fire prevention. In our line of work, when business is slow – it's a good thing for everyone else. We are heavily involved in the Carroll County School System, teaching fire safety to kindergarteners, first, and second graders. We also take an active part in many community functions and teach CPR and Basic First Aid classes through the American Heart Association and American Safety and Health Institute.

*Below is just a partial list of some of the other services we provide:*

### **Emergency Services:**

- Fire Suppression and Investigation
- Hazardous Materials control at the Operations Level
- Electrical Hazards, including wires down or on fire and water leaking into electrical equipment
- Carbon Monoxide and Natural & LP Gas hazards
- Explosion Hazards, including bomb threats and Methamphetamine Labs, in conjunction with CPD
- Rescue Situations, including elevators, vehicle collisions, Low Angle, and some building collapses

### **Fire Prevention and Education:**

- Residential Life Safety Inspections
- NFPA 1 Commercial Inspections
- National Fire Safety Council – Fire Prevention education in Carroll County Schools
- Fire Extinguisher Training
- CPR /AED and Basic First Aid Training also OSHA Bloodborne Pathogens
- Attendance at Community Functions
- Participation in the LEPC and other Local Organizations

### **Other Services Offered:**

- Smoke Detector & Carbon Monoxide Detector Installation – And along with the Kentucky Injury Prevention and Research Center we are sometimes able to provide free smoke detectors to homes.
- Hazardous Chemical Disposal for residential customers, including petroleum based products and others products in small quantities, through agreements/assistance with our local industrial partners.

If the Carrollton Fire Department or I can ever be of assistance to you or you have any questions, feel free to call, email, or just stop by the station house, and I will be happy to assist you in any way that we can.

Again, thank you, for taking the time to educate yourself with our department and the service that we provide.

Sincerely,

*Michael Terrell*

Michael S. Terrell, Chief  
Carrollton Fire Department
